

INDICO BRAND ADJUSTABLE STEM GUIDES

These medium duty stem guides are made of stainless steel, and are ideally suited for the harsh environments encountered in waste water treatment and chemical processing plants of all types.

**Custom styles available
call for information**

Bronze guide bushings fit stem extensions from 1/2" to 2" diameter. These stem guides are formed from solid 1/4" stainless steel and welded, to provide years of service. Mounts easily in existing installations.

Adjustable stem guides
